

In my works I inquire into communication of works and their titles, subjectivity and phenomenon of perception which is influenced by symbolic meaning of visual signs, words, phrases, idioms and our knowledge, which we have in advance and what we believe is truth.

DAY AND NIGHT-painting created during studies in Tallinn this spring. The white parts of this painting is luminescence and shine in the dark to make it visible not only in the day time but at night as well. This work is different from my other paintings. It is more about longing and imagination. The motive here is not an object of reality but the inner reflection.

Staselė Jakunskaitė

(b.1988 , Lithuania)
