

Take a closer look.

Looking at the things too closely, they start to change.

You lose the context, there is no background. Dive into it with your eyes and your brain starts playing tricks on you - new shapes are appearing, something gets more dull, other things stand out, you see a lot of new. You get dragged into another world that lives parallel life. You eyewitness everything, but what do you actually see?

ALISE BĒRŽVADE

b. 1991, Latvia
