Tikriausiai

Tai darbas apie abejonę ir nerimą- sukeltą pasaulio, vitaminų trūkumo, neurologinio sutrikimo ar traumų. Pasirink vieną.

Plastika- tapyba ir plastikas, formuoju kaip noriu. Medžiaga, parafinas, aliejaus potėpis, terpentinas; piešinys, vaizdinys, vizija, vidinis kino teatras, sapnas? Filmus. Bet sapnas vienetas, autentiškas, filmas vienodas, "mačiau per teliką 1969-aisiais", matydamas išvydau dar ir viziją vidinėj kaktos pusėj, parašiau internete. Dabar jis nebe vienodas, gyvena savo gyvenimą teorijoje. Dabar sėdžiu daug, nes negaliu išėiti. Keičiu ekranus, dabar žiūriu telefoną. Tiktoke sakė, kad turiu adhd, bet... neatsimenu, išmečiau plastiką rūšiuot ar į bendrą?

**EN**

Most probably

This is a piece about doubt and anxiety- caused by the world (order), vitamin deficiency, neurological disorder or trauma. Choose one.

Molding - painting and plastic, I shape it however I want. Cloth, paraffin, stroke of oil, turpentine; drawing, image, vision, inner cinema, dream? Movie. But a dream is singular, authentic, a movie is uniform, "I saw that on TV in 1969" and while seeing it I witnessed a vision inside my forehead, wrote it on the internet. Right now it's not so uniform, it lives on in theory. Now I sit around a lot because I can't go outside. I go between screens, now looking at my phone. On tiktok they said that I have adhd, but... I don't remember, I threw that plastic away into the recycling or with the rest?

**Education:**

2014 – 2018 Vilnius Academy of Arts, Kaunas Faculty, Painting BA, Lithuania
